Description of Business

Continental Precious Minerals Inc. (the “Company”) is a reporting issuer that trades on the NEX under the Symbol “CZQ.H”. Current management is actively seeking new business opportunities. The primary office is located at 82 Richmond Street East, Toronto, Ontario, M5C 1P1.

Overall Performance

On August 16, 2019, the Company entered into an amalgamation agreement (the “Amalgamation Agreement”) with Metamaterial Technologies Inc. (“Metamaterial”), a Nova Scotia-based developer of smart materials and photonics, and Continental Precious Minerals Subco Inc. (“Subco”), a wholly-owned subsidiary of the Company (the “Transaction”). Subject to the conditions set forth in the Amalgamation Agreement, the Transaction will take the form of a three-cornered amalgamation, which will result in Metamaterial becoming a wholly-owned subsidiary of the Company by amalgamating with Subco and the shareholders of Metamaterial becoming shareholders of the Company.

It is expected that approximately 67,004,266 the Company's common shares will be issued to the shareholders of Metamaterial as consideration for 100% of the issued and outstanding shares of Metamaterial. Upon completion of the Transaction, the shareholders of Metamaterial are expected to own approximately 86% of the Company's common shares.

Pursuant to the Amalgamation Agreement, Metamaterial may issue convertible promissory notes for aggregate gross proceeds of up to \$600,000 per month, equity under a private placement for aggregate gross proceeds of up to \$6,000,000 and a senior secured convertible debenture from a leading Canadian bank for aggregate gross proceeds of up to \$5,000,000.

Upon the closing of the Transaction, and subject to receipt of all required approvals, the Company intends to change its name to "Metamaterial Inc."

In connection with the Transaction, and subject to the receipt of all necessary shareholder and regulatory approvals, the Company intends to voluntarily de-list the common shares of Continental from the facilities of the NEX board of the TSX Venture Exchange ("TSXV") prior to the completion of the Transaction. It is a condition of closing that the Resulting Issuer obtain a listing of Resulting Issuer Common Shares on the facilities of the Canadian Securities Exchange ("CSE"). As a result, it is anticipated that the Transaction will be governed by the policies of the CSE.

On October 11, 2019, the Company announced that shareholders of the Company ("Shareholders") approved all matters brought before them, including: (i) approval of an amended and restated stock option plan and deferred share unit plan to be effective as of the completion of the previously announced proposed business combination with Metamaterial Technologies Inc. (the "Effective Time"); (ii) the name change of the Company to "Metamaterial Inc." upon the Effective Time; (iii) the change of registered address of the Company upon the Effective Time; and (iv) the voluntary de-listing of the common shares of the Company from trading on the NEX Board of the TSX Venture Exchange at the discretion of the board of directors of the Company.

Disclosure Controls

Disclosure controls and processes have been designed to ensure that information required to be disclosed by the Company is compiled and reported to Company management as appropriate to allow timely decisions regarding required disclosure. The Company's CEO and CFO have concluded, based on their evaluation as of November 30, 2019, that the Company's disclosure controls and procedures are effective to provide reasonable assurance that material information related to the Company is made known to them by employees and third party consultants working for the Company. There have been no significant changes in the Company's disclosure controls and processes during the six months ended November 30, 2019.

It should be noted that while the Company's CEO and CFO believe that the Company's disclosure controls and processes will provide a reasonable level of assurance and that they are effective, they do not expect that

the disclosure controls and processes will prevent all errors and frauds. A control system, no matter how well conceived or operated, can provide only reasonable, not absolute, assurance that its objectives are met.

Internal Control Over Financial Reporting (“ICFR”)

Management is responsible for certifying the design of the Company's ICFR as required by National Instrument 52-109 – “Certification of Disclosure in Issuers' Annual and Interim Filings”. ICFR is intended to provide reasonable assurance regarding the reliability of financial reporting and the preparation of condensed interim consolidated financial statements for external purposes in accordance with IFRS. ICFR should include those policies and procedures that establish the following:

- maintenance of records in reasonable detail that accurately and fairly reflect the transactions and dispositions of assets;
- reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with IFRS;
- receipts and expenditures are only being made in accordance with authorizations of management and the Board of Directors; and
- reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of assets that could have a material effect on the condensed interim consolidated financial statements.

Because of its inherent limitations, ICFR may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Management, including the CEO and CFO, has evaluated the design of the Company's ICFR as of November 30, 2019 pursuant to the requirements of Multilateral Instrument 52-109. The Company has designed appropriate ICFR for the nature and size of the Company's business, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with IFRS except as noted herein.

There have been no changes in ICFR during the six months ended November 30, 2019 that have materially affected, or are reasonably likely to materially affect the Company's ICFR.

The Company's activities expose it to a variety of financial risks: credit risk, liquidity risk and market risk (including interest rate, foreign exchange risk and equity and commodity price risk).

Risk management is carried out by the Company's management team with guidance from the Audit Committee under policies approved by the Board of Directors. The Board of Directors also provides regular guidance for overall risk management.

Credit Risk

Credit risk is the risk of loss associated with a counterparty's inability to fulfill its payment obligations. The Company's credit risk is primarily attributable to cash and cash equivalents and accounts receivable. Cash and cash equivalents consist of cash and investment-grade short-term guaranteed investment certificates, which have been invested with the Company's banking institution, from which management believes the risk of loss to be minimal.

Accounts receivable consists of sales taxes receivable from government authorities in Canada. Accounts receivable are in good standing as of November 30, 2019. Management believes that the credit risk concentration with respect to financial instruments included in accounts receivable is minimal.

Liquidity Risk

The Company's approach to managing liquidity risk is to ensure that it will have sufficient liquidity to meet liabilities as they come due. The Company believes it has sufficient funds to meet its liabilities when they become due.

Market Risk

Interest rate risk

The Company has cash balances and no interest-bearing debt. The Company's current policy is to invest excess cash in investment-grade short-term deposit certificates issued by the Company's Canadian chartered bank. Management believes that the Company's exposure to interest rate risk is minimal.

Sensitivity analysis

As of November 30, 2019, the carrying and fair value amounts of the Company's financial instruments are approximately equivalent.

Based on management's knowledge and experience of the financial markets, the Company believes the following movements are "reasonably possible" over a twelve month period:

(i) Cash and cash equivalents are subject to floating interest rates. As at November 30, 2019, if interest rates had decreased/increased by 1% with all other variables held constant, the loss for the three and six months ended November 30, 2019 would have been approximately \$23,000 (November 30, 2018 - \$26,000) higher/lower as a result of lower/higher interest income from cash and cash equivalents and short-term investments. Similarly, as at November 30, 2019, reported Shareholder's Equity would have been approximately \$23,000 (November 30, 2018 - \$26,000) lower/higher as a result of lower/higher interest income from cash and cash equivalents and short-term investment due to a 1% decrease/increase in interest rates.

(ii) The Company does not hold significant balances in foreign currencies to give rise to exposure to foreign exchange risk.

Commitments

The Company's contractual obligations as at November 30, 2019 include:

Contractual Obligations	Total	Up to 1 year	1 - 3 years	4 - 5 years	After 5 years
Accounts payable and accrued liabilities	\$247,167	\$247,167	\$nil	\$nil	\$nil
Total	\$247,167	\$247,167	\$nil	\$nil	\$nil
